Cary NC 27518

Dear Participating Provider:

As a valued professional in UnitedHealthcare's Triangle health care network, I would like to share with you that Wake Radiology Consultants, Wake Radiology Diagnostic Imaging, Wake Radiology Oncology Services, and Smithfield Radiology will no longer be participating providers in the UnitedHealthcare network effective May 1, 2007.

Our records indicate that you have referred UnitedHealthcare member(s) to these providers in the past 6 months. Please be sure to refer members to in network providers for all of their medical needs. Participating radiology providers can be found in the UnitedHealthcare directory online at [www.unitedhealthcareonline.com](http://www.unitedhealthcareonline.com) if you need assistance in locating or using a participating radiology provider, or you can contact UnitedHealthcare Network Management. We are eager to support your efforts to direct care to participating radiology providers.

We are aware of the importance of radiology services to your patients, and we are committed to maintaining a radiology network that is both high quality and affordable. Given the size of our network, we are confident that you will have no difficulty locating and using a participating radiology provider.

If you have questions regarding this letter, please contact Julia MacDougall at (919)678-4698.

Sincerely,

Gary B. Simmons  
Regional Vice President
